

# Hypergrowth Programme.

**SICTIC**  
SWISS ICT INVESTOR CLUB

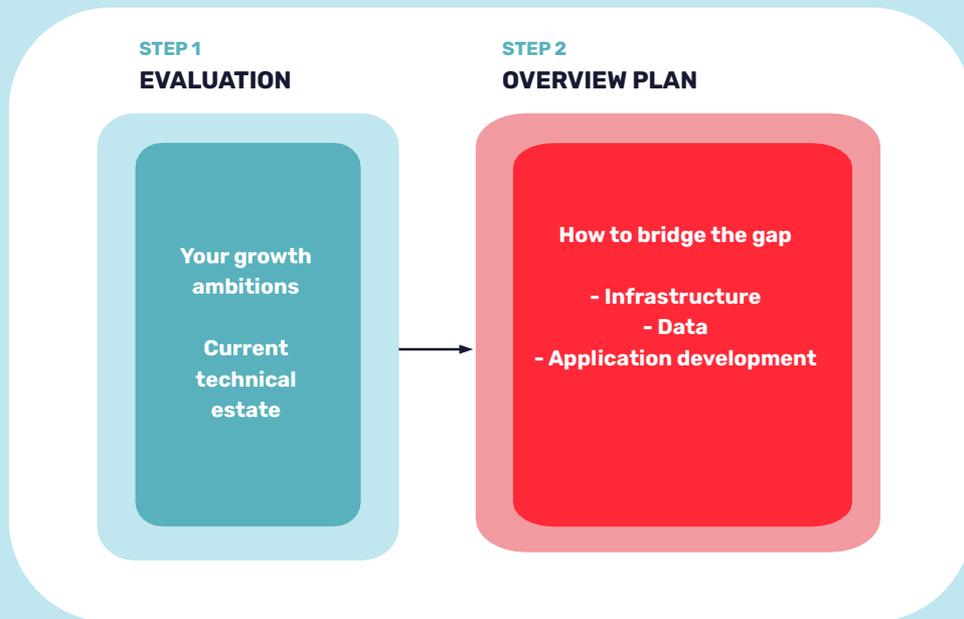

# The Hypergrowth Programme for SICTIC-funded start-ups.

## How do you harness public cloud to drive growth - in revenue and operations - as you scale?

Nordcloud, the European cloud-native leader, is here to help - with a special Hypergrowth Programme for SICTIC-funded start-ups.

Through the Hypergrowth Programme, you get a free high-level evaluation of your ambitions and current technical estate - looking at the infrastructure, data and application development needed to bridge the gap between where you are and where you want to be. You'll receive an overview plan based on our findings.

## Added value at your fingertips.

The Hypergrowth Programme is backed by our proven track record in helping companies use cloud-native technologies to overcome growing pains and scale sustainably.

We can provide you with a coach to support you with implementing the new technologies and ways of working outlined in the plan.

The wider Nordcloud team is standing by to support you with ongoing implementation. Our team of expert advisors can provide recommendations that set your digital strategy up for success.

We have hundreds of experts across disciplines – from cloud architecture, data and application development to project management and go-to-market technical insight. We're standing by to help.

# Agility. Value. Success.

As Europe's cloud-native leader, we've carried out more than 1,000 successful projects. Here's a taste of recent experience supporting a range of tech companies with different challenges.

**myahmed**

A socially-conscious fintech start-up

We helped this fintech start-up build a new digital money app.

[Learn more](#)

Lifecycle solutions for the marine and energy markets

We designed a new online customer portal that delivers an improved user experience, delivering a prototype in just 2 weeks.

[Learn more](#)

**EVBOX**

Electric vehicle charging solutions ranging from ultra-fast charging stations to charging management software

We helped make EVBox's SAP set-up fit for future growth - so it supports agility while maintaining security.

# Start your hypergrowth journey.

**Nordcloud is a European leader in cloud implementation, application development, managed services, training and digital design.**

From digital strategy development to project-specific support, we help you accelerate time to market, maximise cost savings and realise your growth ambitions.

**As a SICTIC partner, we're here to support your growth journey.**

## Faster results

We're cloud pioneers with a 100% cloud heritage. This means we're not just jumping on bandwagons or superimposing trends on to legacy ways of working. You get better, faster results because you have cloud natives guiding your journey.

## Empowered teams

Our entire approach is about empowering your teams, not creating dependencies. From technology to training, from design to DevOps, you get the support needed to capitalise on cloud benefits as part of your digital and business strategy.

## Global cloud leadership

We're a leading partner for all 3 public cloud platforms – Microsoft Azure, Google Cloud Platform and Amazon Web Services – and are a Visionary in Gartner's Magic Quadrant for Public Cloud IT Transformation Services. You therefore get impartial advice based on a broad market perspective.
