

PACKAGE DEAL FOR **MIDMARKET COMPANIES**

Cloud Migration in a Box.

REDUCED FINANCIAL RISK

There are **minimal upfront costs (if any)** because migration costs are spread out and incorporated into the monthly opex for managed services and capacity. This gives you closer alignment between cost and value.

FAST TRACK TO CLOUD VALUE

Our managed services cloud engineers work alongside our cloud advisers and migration experts throughout, meaning there's less of a transition period and **everything is in place for cloud enablement straightaway.**

ONGOING SAVINGS AND COST CONTROL

Savings recommendations help you reduce capacity costs, plus you get **real-time visibility on cloud spend** so you can see where your budget is going and manage it efficiently.

SECURITY & SUPPORT

Migrated workloads go directly into **fully secure 24/7 management** with your same Nordcloud team. **Ongoing support, optimisation and innovation cycles** begin earlier in the migration lifecycle.

WHY NORDCLOUD

Simply put, Gartner recognises us at the leading cloud-native business in the industry.

1,000+ Public cloud implementations

1000+ AWS certifications

40% Cost savings routinely achieved for customers

4x Faster migration process routinely achieved compared with other migration proposals

Why take on financial and operational risk when Nordcloud makes migration so easy and cost-effective?
